

Sunder rup competitions are designed to make learning joyful for the participants.

Participants learn and participate and will also get the chances to win certificates and the cash prize depending upon their performances

Competitions we design in education, culture, sports and environmental related

Learning Through Competition

Learning through competition is an educational approach in which students learn knowledge, skills, teamwork, and problem-solving by participating in healthy, structured competitions. The focus should be on learning and personal improvement rather than simply winning.

1. Objectives

Develop interest and motivation towards learning.

Encourage students to participate actively.

Improve problem-solving and critical-thinking skills.

Develop confidence and communication skills.

Encourage students to apply classroom knowledge in practical situations.

Promote teamwork, leadership and cooperation.

Help students learn how to handle success and failure positively.

2. Types of Competition-Based Learning
